Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60796	3/4/2025	3/18/2025	Thomas Crushing	Fugitive Particulate Matter Permitting	Lone Jack /Johnson	KCRO	CK	Other
Concerned Party:		Anonymous						
Concern Info:		Concerned party reports that there is a crushing operation on the south side of 50 Hwy to the east of Lone Jack going toward Warrensburg. Approximately between Perry's gas station and CK Enterprises. CP said that you could see the operations from the highway and noticed a lot of dust and wondered if they had a permit to be shooting and crushing at this location. Stated that no one was out there today because of all the rain.						
Conclusions:		The Thomas Crushing portable plant that was at this location was found to have a valid construction permit for crushing rock at this site. According to Construction Permit 032017-007G, the processed aggregate will remain on site. No violation was found during this investigation.

60892	3/11/2025	3/19/2025	St. Joseph Landfill	Odor	St. Joseph /Buchanan	KCRO	DS	Phone Conversation
Concerned Party:		Susie Hanway						
Concern Info:		Concerned party reports odor so bad from the landfill that they had to go back inside and it was 4:00 pm on March 11, 2025. CP believes that it may be the warm weather and the odors are starting back up again.						
Conclusions:		No offsite odors were observed at the time of investigation. Landfill is considering using a deodorizer this summer.

60916	3/13/2025	3/18/2025	Unknown	Open Burning	Kansas City /Platte	KCRO	MC	Referred to Other Agency
Concerned Party:		Jeana Houlihan						
Concern Info:		CP stated there is burning going on and she is concerned in regards to her family's health from the smoke; and also concerned as the area is under a burn ban.						
Conclusions:		The area of the concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency,which is the City of Kansas City Health Department's Air Quality Program. Since the area is near the city limits, advised Kansas City Air Quality to return concern to us if they find the issue is outside their jurisdiction.

60918	3/12/2025	3/19/2025	Unknown	Open Burning	Shell Knob /Stone	SWRO	CR	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Anonymous concerned party called to report burning of trade waste (PVC, etc) at a home construction site. Produced black smoke that affected elderly neighbors. The Shell Knob Fire Department (23463 State Hwy 39) responded to the fire and recommended the concerned party call MDNR-SWRO.						
Conclusions:		SharePoint #12674 Regulated material was removed from the pile before being burned. Workers at the site were informed and given copies of the open burning regulations. No further action is required.

Concerned Party:		Ron Hillyard						
Concern Info:		Concerned Party reports that on Thursday evening March 13, 2025, at 4:50 p.m., that dust from a blast crossed over onto his property. He sent a video and picture which seems to confirm this assertion.						
Conclusions:		I did not observe any dust violations at the time of the investigation, but no blasting occurred during the site visit. Concerned party and quarry management have since discussed the issue and appear to have an understanding of future work to be done that will help mitigate blasting dust issues.

60942	3/14/2025	3/19/2025	Jonah Popa	Open Burning	Springfield /Greene	SWRO	BD	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Per email-Responsible party is burning construction waste that is being removed from the home onsite. Lots of black smoke and has a chemical smell.						
Conclusions:		SharePoint 12706 No violations of 10 CSR 10-6.045 were observed at the time of the investigation. Fact sheets on open burning were provided to the occupants at the time of the site visit, but no contact was made with anyone at the time.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60944	3/14/2025	3/19/2025	Troy McPherson	Open Burning	Nixa /Christian	SWRO	BD	Site Visit
Concerned Party:		Jimmy Smithwick						
Concern Info:		From email submitted: Concerned party states they are doing a house remodel at 1438 and have essentially gutted their house and placed the debris in a burn pile in their yard. He stated yesterday they placed a bunch of brush on top of it and he is concerned they will light it off when the weather allows. He states the brush pile is only 80' from his fence and when I look at the GIS map it is only a 2 acre lot so even burning brush with the appropriate distance would be tough. He is concerned about any runoff affecting his pond if they do burn it, which would affect his livestock.						
Conclusions:		SharePoint #12713 No violation of 10 CSR 10-6.045 has occurred yet. Compliance assistance was provided and fact sheets were left with the occupant to inform them that they cannot burn demolition waste.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60968	3/17/2025	3/18/2025	Martin Underground Construction, Inc.	Other	Raytown /Jackson	KCRO	MC	Other
Concerned Party:		Anonymous						
Concern Info:		Via Webform - Submitted at 11:30 am Monday, March 17, 2025 - Comment/ Compliment						
Conclusions:		I worked at a construction company located in Raytown, Martin Underground Construction, Inc., and the office building has black mold in various places throughout the building, ceiling tile, walls and bathrooms. I had mentioned to the owner several times during my year and a half employment term, that this needed to be taken care of and each time he said he would handle it, saying it was an old building and you just have to deal with it. I have had several sinus infections over the period of time I had worked there and when mentioned to my physician that I was in an moldy building she had said I might consider working somewhere else that it was definitely contributing to the infection. There is also two fuel tanks underground that have not been removed and the owner claims it's not his responsibility and won't handle that concern either.						
Conclusions:		The department has no regulations concerning mold. This portion of the concern was referred to OSHA's Kansas City Area Office. The portion of the concern about underground storage tanks was referred to the department's Underground Storage Tanks Section.

60973	3/17/2025	3/19/2025	Unknown	Asbestos	St. Joseph /Buchanan	KCRO	DS	Phone Conversation
Concerned Party:		Dave Barnes						
Concern Info:		I have some Mexican up the street from me smashing asbestos siding off the house letting it hit the ground and they are not wearing any protective clothes or mask. I told them that it was illegal for them to be doing what they considered safe. I live down the street from there and I have done nothing to do about it but shut them down.						
Conclusions:		This is a single, residential structure and is exempt from the asbestos air pollution regulations. I was unable to make contact with anyone, so I left handouts on the door about how to properly dispose of demolition waste.

60974	3/17/2025	3/17/2025	Sam O'Neil	Open Burning	/Webster	SWRO	TW	Letter LOW
Concerned Party:		Anonymous						
Concern Info:		Brush burning in Rogersville off Highway 60 between Bill's Quick Mart and Higher Vision Worship Center. Smoke is dark and may indicate the use of an accelerant. Smoke has also crossed Highway 60 and is impeding traffic. The department has already contacted the Logan-Rogersville Fire Department and found that there is no burn ban in the area and they will not extinguish the fires. Setback distances are likely not met and the volume of the piles suggests that the fires will not self-extinguish before sunset. LR Fire sent the Chief to speak with the responsible party this afternoon.						
Conclusions:		SharePoint #12740						
Conclusions:		A letter of warning is being issued for violations of the open burning regulations.

60996	3/18/2025	3/24/2025	Harold, Mayor of Walker	Open Dumps Open Burning Fugitive Particulate Matter	Walker /Vernon	SWRO	MK	Phone Conversation
Concerned Party:		Michael White						
Concern Info:		I live at 202 West Marvin Ave in Walker, Mo. The City of Walker is using railroad property next to my house as a burn pile for brush and trash. The fire is unattended most of the time and trash and other debris will blow onto my property and my neighbors property. I have filed a complaint with the city which they agreed to shut the site down. It's dangerous because water will sit around the trash and soot. It stinks and it's causing ashes to fall onto my home and trees. The site shutting down was agreed on in December 2024. Now March 2025, it's open again and brush and trash are being dumped. This is dangerous and will cause issues with our environment and homes.						
Conclusions:		SharePoint #12759 The City of Walker is placing concrete barriers and no dumping signs in the area to prevent promiscuous dumping.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60998	3/14/2025	3/18/2025	Pilot Grove Elevator - Prairieland FS	Permitting Fugitive		NERO	SB	
Concerned Party:		Patrick Skain						
Concern Info:		Email states, "I am writing to express my serious concern regarding the proposed fertilizer storage facility by Prairieland FS, located in Pilot Grove Missouri near a residential area, including homes and daycare where children frequently spend their time. While I understand that such facilities may be necessary for agricultural and commercial purposes, I believe there are significant risks and impacts that need to be carefully considered, particularly for the safety and well-being of the surrounding community, especially the children.						
Conclusions:		Provided compliance assistance to Prairiland FS regarding the construction permit requirements for building a bulk fertilizer plant. A follow-up letter will be sent.

61001	3/17/2025	3/21/2025	Martin Marietta Materials, Inc. - Greenwood Quarry	Fugitive Particulate Matter	Greenwood /Cass	KCRO	DS	Email
Concerned Party:		Craig Nelson						
Concern Info:		My family lives in Greenwood about 3/4 of a mile from Martin Marietta mine. We have noticed that when there is even a light wind from the south, the neighborhood is covered in a thick dust cloud from the mine. On days when there is a strong breeze, so much dust settles in my yard that when you walk across it, dust kicks up from the grass. I am concerned about the health of my family and am curious what rules the mine is supposed to follow about keeping dust on site. They very clearly are not keeping dust on site.						
Conclusions:		At the time of investigation, no fugitive dust was observed leaving the property. Opacity from the equipment was near, but did not appear to exceed, the limit. Recommended more frequent cleaning of spray bars.

61004	3/19/2025	3/24/2025	Clayton Pittman	Open Dumps Open Burning	St. Joseph /Buchanan	KCRO	MU	Other
Concerned Party:		Anonymous						
Concern Info:		A concerned person called and stated that Clayton Pittman dumps trash on a property yard located at 8023 SE King Hill Road, St. Joseph, Missouri. According to the CP Pittman dumps trash on the property yard and burns them at night. Pittman is a cousin brother to Sarah Hale and Sarah Hale is the daughter of Renda Hale the owner of the property who has passed away, but the property is still in her name. In addition, the CP stated that there is a camper on the property. One person lives in the camper with two dogs. There is also a house on the yard and two other persons are also living in the house.						
Conclusions:		Compliance assistance provided and solid waste and air pollution regulations explained.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61007	3/19/2025	3/6/2025	Max Cook	Open Burning	Long Lane /Dallas	SWRO	GE	Report
Concerned Party:		Anonymous						
Concern Info:		The CP called expressing concerns about their neighbor burning trash (including electronics and tires) and the air pollution from that has gotten worse since the high winds started last week. They haven't gone to the neighbors to see what they're burning, but the CP burns their own trash and they can tell by the smell and dark color of the smoke that its not just household trash being burned. The CP is fairly certain there are tires in the burn pile. They only burn at night. The CP was contacted last week about this issue from another concern not filed by them. They couldn't remember the name of who they spoke to. I believe the concern ID is 12510.						
Conclusions:		SharePoint #12785 Open burning, operating an illegal landfill and illegal disposal of solid waste						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61011	3/19/2025	3/20/2025	David Davenport	Open Burning	Drexel /Cass	KCRO	JS	Email UF
Concerned Party:		Randy Powers, Fire Marshal						
Concern Info:		<p>The following letter was received via email:</p> <p>Please review the following documentation relating to the below named individual who is fully aware that the burning of structures is not allowed by our local Ordinance and by State regs as per your office. I have enclosed 2 reports of the burning of structures on his property. I have advised this individual numerous times on the process of obtaining a South Metro burn permit before I retired from South Metro Fire. I have also advised him on the West Peculiar Fire open burning permit process and what can be burned with the permit. I also advised him again on the fire on 10/28/2023 and 03/28/25 [correction by JS: should be 3/08/25] of the burn regulations in reference to the burning of structures within our Fire District and within Cass County. We ask that the proper process be done in an attempt to keep this from occurring again within Cass County. I do know that he owns many acres within Cass County and may have other structures that he could burn in the future. He has admitted to me that these structures were burned by an unknown individual but not by him. Since these structures have no insurance on them there have been no criminal violations committed.</p> <p>Structure # 1. 10/28/23 14308 E 237 Peculiar, MO 64078 Structure# 2. 03/08/25 30500 Davenport Road Drexel, MO 64742</p> <p>The owner of properties where the structures have been burned are listed below. Ref: Dr. David Davenport 23508 S. State Route C is his residence Peculiar, MO 64078 Mailing address 19603 S. Harrelson Dr Belton, MO 64012</p>						
Conclusions:		<p>According to the fire department, 14308 East 237th Street burned in October of 2023. Due to the amount of time that has passed, this investigation focused on the more recent incident at 30500 Davenport Road.</p> <p>David Davenport stated that he did not burn the house at 30500 Davenport Road, but he did give permission to the individual who conducted the burn.</p> <p>A Letter of Unsatisfactory Findings is being issued to David Davenport for open burning of prohibited items.</p>

61016	3/14/2025	3/18/2025	Rusty Nails Lawn Care	Open Burning	California /Moniteau	NERO	SB	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		Email states, "I have filed a complaint in the past about a property owner named Tyler Blank who owns a large dump site in California, MO. I believe he has been instructed by your department to clean that property up. Yesterday afternoon, I noticed a very large black smoke plume coming from that property. Curious if he was burning debris from the clean-up site, I drove by there today and in fact was able to observe from the road a very large pile of still burning debris. I took some pictures and will attach them to this complaint if there is a feature below to do so. A truck for "Rusty Nails Lawncare" was also observed at the site at the time of the burning of debris. Rusty Nails Lawncare lists their address as 601 Ryan Ave, California, MO on their Facebook page."						
Conclusions:		At the time of the investigation, no violation of the open burning rule. Exempt burning of brush had occurred.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61018	3/19/2025	3/19/2025	Synagro	Odor	Polo /Caldwell	NERO	BH	
Concerned Party:		Sheila Milligran						
Concern Info:		Via email, "This odor has held me hostage in my home. I cannot open windows, doors, work outside or hang clothes in my line. I'm afraid there's cancer causing agents in this concoction. My property values have gone downhill since Show Me Farms has engaged in this process. It's disgusting. It's been going on a couple years but this is the worst year so far."						
Conclusions:		no odor violation; agriculturally exempt

Concern Info:		COD concern-						
Conclusions:		Woman who owns house at 22298 Elk Road Lawson, MO 64062 burned down and is now burying an old home just to the south of her primary home at 22298 Elk Road. Home had asbestos shingles. Woman (name unknown) burned the house last night and is now burying the burned debris. CP called the City of Lawson fire department last night and they stated that she did get a permit to burn brush. When the fire department showed up the house was burning and they did not put it out according to the CP.						
Conclusions:		Waste from the demolition of a house was disposed of by open burning then buried on site. A Letter of Warning will be issued for the air and solid waste violations.

61054	3/20/2025	3/20/2025	Leslie German/Troy Silvy	Asbestos Open Burning	/Iron	SERO	JW	Phone Conversation
Concerned Party:		Carla Dillinger						
Concern Info:		CP States: The iron County Commissioner office through guidance from Leslie German and Troy Silvy are allowing people to burn tornado damaged homes that have asbestos siding and shingles. They are not separating the asbestos materials prior to burning. They are just allowing folks to tear them down and burn them in place, even in the extreme windy conditions. CP is worried about damage to the Air, Soil, and water quality.						
Conclusions:		The Iron County Emergency Management Director Lucas Anderson was notified. He advised he re-emphasized following the necessary environmental considerations with the community and city officials. He also advised that he discussed with the Sheriff's department and efforts would be made to negate any improper management/open burning efforts.

61059	3/24/2025	3/24/2025	City of Sedalia	Asbestos	Sedalia /Pettis	NERO	DB	Other
Concerned Party:		Debbie Covington						
Concern Info:		"We have four homes that were on a demolition list for the City of Sedalia on 2-26-25 (818 West 5th Street, Sedalia, MO 65301, 830 West 6th St, Sedalia, MO 65301, 119 South Stewart, Sedalia, MO 65301 & 1512 S. Prospect, Sedalia, MO 65301). The City of Sedalia demolished three homes before DNR stepped in and stopped the demolitions because they have not been testing for asbestos. Three out of four homes ended up testing positive for asbestos and have to be abated. No one is testing for lead. What can be done: They have demolished 149-200 homes without lead or asbestos testing. Is there anyone that can help the Sedalia community: The community, city workers, citizens, animals etc. have been exposed and lead and asbestos have been irresponsibly dumped in our local dump without their knowledge."						
Conclusions:		No additional violations have been alleged. See ACE#60745 for report and violations found.

61072	3/20/2025	3/25/2025	Eagle Ridge Landfill	Odor Sanitary	Bowling Green /Pike	NERO	BH	
Concerned Party:		Vicki Bommarito						
Concern Info:		On March 20, 2025, the Northeast Regional Office received a concern stating that there are strong odors coming from the Eagle Ridge Sanitary Landfill. The caller stated that the "methane" is so bad that it is making them and their family members sick. Reportedly, one of the caller's children has asthma and their partner has COVID related disabilities, which are exasperated by the odors from the landfill. The caller stated that last Thursday they were attempting to carry groceries into the house and the "methane" was so bad that they vomited. The caller stated that the odors are usually more intense in the morning and evening, but over the last few days the odors have been strong all day. The caller stated that they have attempted to contact the landfill on multiple occasions in person and via telephone, but have not gotten a response. The caller also complained about noise and light pollution and told me that they have hired an attorney and plan to sue the landfill.						
Conclusions:		no violations of the Missouri Odor Rule were documented at the time of the investigation.

Concerned Party:		Anonymous						
Concern Info:		Via Webform - Submitted at 11:08 pm Tuesday, March 25, 2025 - Date of Incident or First Noticed: 03/25/2025						
		<p>On the evening of March 25, after dark, there was a lingering smoke and chemical or plastic type smell on the North side of Hume. There was a decent sized fire burning in the back yard of the home. I am not sure of the exact address of the house, but the parcel number from Bates County GIS (https://batesgis.integritygis.com/) is 2503108030005002000, listed as owned by HUMPHREY, VIOLET LIFE ESTATE. Currently there are renters there. Fires are a common occurrence there, and this was the only fire we were aware of on the north side of Hume this evening.</p> <p>This seems to be an ongoing issue. Chemical/plastic/bad smells from those fires are not uncommon. I do not know what is being burned, but it does not smell good. Once I witnessed an extremely dark plume of smoke right after a fire was lit.</p> <p>My concern is the repeated nature of this. There are numerous households with kids in the area, and the Hume School is located one block to the east.</p>						
Conclusions:		The investigation found that plastic insulation was removed from copper wire by open burning. A report with Unsatisfactory Findings will be issued for disposing of salvage operation waste by open burning.

61091	3/24/2025	3/24/2025	Rail Road	Odor	/Franklin	SLRO	HH	
Concerned Party:		Denna Kriese						
Concern Info:		We recieved an odor concern from the EPA. The CP states " I do not live in Pacific Missouri, but my children and grandchildren do. Their house is next to the railroad. They live at 169 Vincent. They have very small children ages 2 to 5. Shortly before Halloween, apparently there was a spill on the railroad tracks. It made the town smell like something rotten. At first, we thought it was the pumpkins that clearly was not. I'm being told that it was some type of grain, but I dont know if that was in an assumption. Whatever was spilled has rotted and makes it stink so bad outside it is unbearable. It was a little better in the winter time, but now as it is warming up, it's getting really bad again. Sommetimes this time of year it matters which way the wind has shifted. They have had plenty of time to clean this up an deal with it and I don't know why this is still smelling. I don't want my grandchildren smelling that especially since we don't know what it is. Even if we knew what it was it is still a menace. Somebody needs to step in. This is something you could check into please. You could probably contact the city of Pacific and see what measures have already been taken. Whatever they are they are not enough, but it might be a starting point.						
Conclusions:		I went to the site and did not encounter any odors. I went to City Hall and let them know about the concern and they will be getting in touch with Union Pacific.

Concerned Party:		Susan Dagley						
Concern Info:		The CP called with concerns about "an extreme" foul odor originating from the property on Gateway drive between Thurman and Shoal Creeks (Approximately located at 37.012093, -94.478689). Another concern was initiated by the CP on this same property in October 2024 (11273) concerning land disturbance and runoff. The property owners have since obtained a land disturbance permit (MORA27230); the CP believes they are operating outside of the permit they obtained, and are potentially dumping waste which could contribute to the odor. The operation conducts topsoil harvesting which encompasses 85 total acres. The discharge from this facility flows into both Shoal Creek and Thurman Creek.						
Conclusions:		SharePoint #12884 Source of odor was not affiliated with land disturbance practices. Land application odors are not regulated. No action taken.

Concerned Party:		Jason Tope						
Concern Info:		CP called to report open burning of const., plastics, and possible explosives or spray cans. The person burns at night, leaves in the morning and comes back to burn again. This is on an abandoned lot, where the person has torn down a vacant house and filled the dumpster and now has piled up the remainder of items and is burning. The CP has called the police and fire department, and they told the CP that they cannot not do anything.						
Conclusions:		Open burning of prohibited items was confirmed by the Adrian Fire Department; however, illegal burning had ceased at the time of the investigation. I contacted Troy Pittman, who was cooperative. Information on open burning regulations was provided, and Pittman agreed to properly dispose of regulated solid waste.

Concerned Party:		Officer Vanessa Kennedy						
Concern Info:		<p>-- Submitted at 2:00 pm Thursday, April 3, 2025.</p> <p>-- Date of Incident or Date First Noticed: 04/02/2025</p> <p>-- Please describe your concern, including the location on the property: While off duty and approximately ten minutes after leaving Archie, Missouri—a city I regularly patrol—I observed a large fire at the rear of the property located at 303 NW Outer Rd in Archie, MO. Recognizing the potential hazard, I immediately contacted dispatch to notify the local fire department. Upon their arrival, the fire crew identified the burning of tires, furniture, and other hazardous materials, which is a direct violation of City Ordinance 312 regulating open burning within the corporate limits of Archie. A formal report was filed with the Archie Police Department, leading to a citation being issued to the individuals involved. These individuals had previously been warned against such actions. Additionally, the landlord was informed of the incident, and the City of Archie issued a formal letter containing a warning on March 26, 2025. Any contact or identifying information provided in this report is subject to release under the Open Records laws. REPORT#25-00035</p>						
Conclusions:		Officer Kennedy of the Archie Police Department confirmed that unauthorized items for open burning were found on site, along with my visual confirmation of burned wood at the address site. At the time of the investigation, burning had already ceased and the responsible party had been issued a local citation. Information on Missouri's open burning regulations was left at the residence. Since the violation appeared to be resolved during the investigation, an informational letter will be issued to Pittman. The department will reinvestigate if potential violations are reported in the future.

61224	4/4/2025	4/8/2025	Shane Bailey	Particulates Fugitive	Wheaton /Barry	SWRO	JW	Phone Conversation
Concerned Party:		Mike Swearingen						
Concern Info:		Mike Swearingen states that a couple farm boys have been mixing feed on their property, and the dust is everywhere. This has been going on for over a year now. The dust coats his deck and vehicle and makes it difficult to breathe on most days. Mike said one day there was so much dust in the air it looked like snow. Mike would like to be contacted by the investigator						
Conclusions:		SharePoint #13032 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61234	4/7/2025	4/10/2025	Brian Mazur	Open Burning	Agency /Buchanan	KCRO	CK	Phone Conversation
Concerned Party:		Michael Thomas						
Concern Info:		CP is a voluntary firefighter and is concerned about a property near him burning something that has a chemical, rubber, and/or oily smell. The owner of the property he is concerned about owns two lots with a trailer and several out buildings. The RP has a big light that has created a nuisance in the past with the residents and will turn that light off at night while he burns whatever he is burning so the neighbors cannot see what he is burning. The RP has a lot of automotive equipment on their property. Several neighbors are experiencing the same thing and it has been so bad that they come in smelling like a house fire and get covered in an ash substance sometimes.						
Conclusions:		I found no evidence of open burning at the property. There was a stovepipe on one of the small outbuildings, but nothing else was seen during the investigation. Mazur denies any burning. No violations found.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61235	4/7/2025	4/16/2025	Leevi and Abby Babb	Open Burning	/Newton	SWRO	GE	Communication In Person
Concerned Party:		Anonymous						
Concern Info:		Caller states that someone is burning 10-15 tires, mattresses, carpetting, and household waste for at least 3 days in a row. Caller states that they told the source of concern that they shouldn't be doing that, and then they started piling limbs and branches on top of the pile to hide the burned material.						
Conclusions:		SharePoint #13042 No further action necessary at this time.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action

61240	3/28/2025	3/28/2025	Scott & Tiffany Chestnut	Open Burning Open Dumps:	Poplar Bluff /Butler	SERO	BC	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		CP states the RP is tearing down houses and remodeling homes and dumping the waste onto a property on county road 307 in Poplar Bluff. CP states that the RP is allowing others to dump on this property as well. CP states they then burn the waste on site as a disposal method. CP states the fire dept has been there in the past.						
Conclusions:		The department issued a Letter of Warning dated April 4, 2025.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61241	3/24/2025	3/25/2025	Daryl Williams	Open Burning Other	Belle /Maries	SERO	BC	Phone Conversation
Concerned Party:		Robert Gilbert						
Concern Info:		EER line received 03/22/2025. Department received 03/24/2025. CP States: his neighbor continues to burn used tires on the property. The duty officer contacted the local fire department via the non-emergency number and they advised they know about the issue but they will not respond to private property to extinguish tires. This concern is being referred to the appropriate regional office.						
Conclusions:		The department has informed parties mentioned on the concern of the regulations of disposing of scrap tires and waste items. If more information becomes available or an additional concern is received the department will investigate further.

61290	4/11/2025	4/11/2025	Square Deal Auto	Open Burning Hazardous	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party:		Heather Lustfeldt						
Concern Info:		<p>Concerned Party (CP) called to report that Square Deal Auto (SDA) has been burning at night which gives off a sharp, noxious, chemical smell. She reported the burning last night (4/10/25) around approximately 10:50pm to 911 and KCMO fire department arrived and put out the fire approximately 10 mins after the call. SDA also burned last Friday (4/4/25) at night around the same time. CP was able to capture a video of the fire prior to the KCFD arrival.</p> <p>CP has concerns with hazardous materials laying around as well.</p> <p>CP does not know the name or contact information of the owner. Information in this form was obtained via internet search.</p>						
Conclusions:		This concern is located within the city limits of Kansas City, MO; therefore, the open burning portion of this concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program. The hazardous materials portion was sent to KCRO's waste management unit.

61304	4/14/2025	4/15/2025	Rothwell Construction, Rick Dodd, Superintendent	Fugitive Particulate Matter	Lake Lotawana /Jackson	KCRO	DS	Phone Conversation
Concerned Party:		Don						
Concern Info:		Dirt and dust concern on the southeast corner of 50 Hwy and 7 Hwy. CP claims it's associated with a QuikTrip and dirt/rock/gravel operation. CP says they have been in operation for a while, but dust concerns have been popping up as of the last 3 months. CP claims he has been in contact with Cunningham about the situation.						
Conclusions:		High wind conditions resulted in some dust being observed from the construction site and Dirt World. Both locations have agreed to water their haul roads more regularly during windy days to keep dust down. While some dust was observed, I did not observe any crossing property boundaries during the visit.

61320	4/8/2025	4/14/2025	Walnut Hill Meat Processing	Open Burning	Philadelphia /Marion	NERO	BH	
Concerned Party:		Anonymous						
Concern Info:		The information provided states that Walnut Hill Meat Processing is burning railroad ties and it is creating a bad odor.						
Conclusions:		4/14/2025 on-site investigation						
<p>I arrived at Walnut Hill Meat Processing at 3:00 PM. No one was at the site so the investigation was conducted from the road. I observed trees that had been cut up and a small burn pile of vegetation. There were stacks of railroad ties but I did not observe any that had been burned.</p> <p>4/15/2025</p> <p>I contacted Walnut Hill Meat Processing and spoke with Richard's son Aaron. I explained to Aaron that I was investigating an environmental concern at Walnut Hill Meat Processing regarding railroad ties being burned. Aaron said he was not aware of any railroad ties being burned. He explained they recently cut down some cedar trees and burned them. I asked about the stacks of railroad ties I observed and what the future plans were for them. Aaron explained they are planning on building fence using them. I reviewed the Missouri Burning Regulations with Aaron and asked if he had any questions; he did not.</p> <p>An information letter will be sent to Walnut Hill Meat Processing.</p>

Concerned Party:		Johnny Avance - Mayor - Haywood City						
Concern Info:		CP States: am the mayor of Haywood City and would like to get some assistance if getting action taken about the smell coming from the area behind Scott Central School. It smells like raw sewage or worse. It is coming from something a Farmer is applying as fertalizer. The smell is so strong it is entering the houses in the area. This needs checked out. They are possibly storing this behind the Scott Central School. It could be Hartland Farms on HWY 61 but not sure.						
Conclusions:		No violations of Missouri Air Conservation Commission's odor regulation (10 CSR 10-6.165) were observed.

Concerned Party:		Linda Williams						
Concern Info:		CP States: There is a smell that is nausiating in the air. It causes your nose to run/drain when you go outside. It is believed that it is coming from some type of fertilizer that an area farmer is using. CP is unable to open windows or go outside because of the smell. It has been an ongoing issue for about 5 months. Smell is more noticeable when the wind is blowing. Smell is like that of dead bodies in a morgue.						
Conclusions:		No violations of Missouri Air Conservation Commission's odor regulation (10 CSR 10-6.165) were observed.

Concerned Party:		Anonymous						
Concern Info:		online report states: Open burning of off site vegetation in an open earthen pit on US 65 that reduces visibility for traffic. To be clear there is large cut vegetation being hauled in to the site and burned in the aforementioned pit.						
Conclusions:		Map shows no structures within 200 yards. Unable to verify if smoke would obscure visibility due to temporary nature of smoke. Called site owner and discussed burning rule.

Concerned Party:		Anonymous						
Concern Info:		<p>Report states: "Several homeless people are parked on the property of 7447 E Hwy HH Hallsville/Columbia, Missouri. The property owner does not have adequate sewer/lagoon, and feces is running into the creek behind the property. The campers are running feces and human urine on the ground, in the pond, and into the creek. They are burning hazardous material behind the house and near the pond, including electrical poles, tires, and copper wire burnoff.</p> <p>They have boats that are used for everyday housing on the pond, with feces and urine running into the water. The homeowner Mary Garver and her son are allowing this to happen. The amount of trash, broken down vehicles, tires, and debris, are causing infectious diseases and is cause for major concern for not only the environment but also human health.</p> <p>The property is zoned agriculture but houses campers, trash, and tires. This has been going on for a year now. The fire department has been called to the house for burning material with dark black smoke coming from the back of the property and there is a chemical smell coming from the property when there is a light breeze.</p> <p>Tires are seen floating down the creek and down in the creek bed, along with trash and debris from the property. There are several campers at the top of the property and several down at the bottom of the property near the creek."</p>						
Conclusions:		Violation of the solid waste management law and open burning regulations may have occurred. Provided information to residents and owner.

61595	4/8/2025	4/9/2025	Steven Langley	Other	Fairdealing /Ripley	SERO	HC	Letter
Concerned Party:		Felcia Jones						
Concern Info:		Steven Langley and three men, his wife and small daughter are crushing old boats and trailers, burying them and setting fire during tornado watches and warnings. Today is the third time. The first time, we called the fire department, the fire department responded during an active tornado and burn ban. They were shortly back at it, and, now doing it a third time. We think this could be a drug site as we have seen suspicious activity on the property before the trailers and boats were burned. This is destroying our air, land and water quality. It is putting us in fear everytime a weather system rolls in. We have contacted local authorities. They do not seem to be concerned for this roads safety. This was a failed trailer park that did not pass a sewage lagoon. Now they are burning of 30 year old trailers and boats he cant sell at his business. he does not deserve an insurance claim. he is taking his kids along when he does this. this is also affecting my neighbor deans cows and their pond.						
Conclusions:		<p>On April 9, 2025, I arrived on site around 4:15 p.m. While on site I viewed the area described in the concern received by the department. I viewed and took photos of the boats and property in question. While on site I noted two boats which had been burned and another area which had a small burn pile. I did notice recent dirt work towards the back of the property. No one was on site at the time of the investigation.</p> <p>On April 18, 2025, around 9:00 a.m. I spoke with Steven Langley via telephone. I mentioned I had been to the property and had taken photos of the burnt boats. Steven stated the boats caught fire from high winds while he was cleaning up leaves and brush in the area. I asked if the boats had been disposed of and if any boats had been buried which he denied. I informed Steven if any dispose had been done that receipts would need to be submitted to the department to return to compliance. We agreed to meet at the location at 11:00 a.m. on April 21, 2025.</p> <p>On April 21, 2025, I met with Steven Langley at the site of the burning around 11:00 am. I explained the nature of the concern received by the department and provided a business card and multiple factsheets. I provided Steven with a copy of "Facts on Open Burning under Missouri Regulations - PUB 2047", "Managing Construction and Demolition Waste - PUB2045" and "Illegal Disposal of Construction and Demolition Wastes - PUB-2251." Steven explained that the boats were accidentally caught on fire by a group of "scrappers" he had hired to remove scrap metal from the property. While these "scrappers" were removing scrap metal from the property they also burned vegetative material to clean up the property, this with high winds is what caused the accidental fire.</p> <p>While on site Steven and I looked around the property, I noted the concerns about the remains of the burnt boats as well as another burn pile behind the building on the property. While observing the boat, Stephen stated he does have plans to remove components of the boat that are still valuable but then he does plan to bring the remains of the burnt boat either to a scrap yard or to a transfer station. We observed the burn pit behind the building on the property, I informed Steven the materials in the burn pit did appear to be prohibited materials and would need to be disposed of properly. Steven stated that he would be in contact with a dumpster service to remove the material from the burn pit.</p> <p>On April 21, 2025, Steven provided documentation via text message showing payment for a dumpster service to be brought to the property.</p> <p>On May 4, 2025, I recived photos documenting cleanup activities via text message from Steven Langley. A Letter of Warning was issued on May 7, 2025 for improper disposal of waste and open burning.</p>
